

Subject Index

NOTES FOR USE OF THE SUBJECT INDEX

Citations give the year/month, not the volume/number. This matches the way the issues are listed on the website. In the case of multi-month issues, the citation refers to the first month, e.g., August-September, 2019 is cited as 2019/08.

The page number refers to the first page of the article, not to all pages. For example, all entries for the minutes of the annual meeting refer to the start of the minutes.

A "p." in the Notes column indicates the issue includes a picture of the subject.

Some entries have cross-references. "See" means all entries will be found under an alternate word or phrase. "See also" means another word or phrase may supply additional entries. "See under" means the term appears as a subentry under another wider subject.

The index is sorted by computer, which means it may not always be in exactly the expected order, especially if the entry includes punctuation or numbers, e.g., Chap. 107 sorts before Chap. 5; Carter, Don sorts after Carter Volunteer Recognition Award. However, there should not be enough difference to cause major confusion.

Names have been indexed when there is substantial information about the person within the text. As an example, the subject of a "Who's who" article is indexed, but other names mentioned within the article might not be indexed, depending on their importance. Names in continuing lists, such as officers and award winners, are not indexed. To find all references to a name, regardless of context, it would be better to use the "Custom Search" feature on the web. (Go to the WFSC website; click on Across the Fence Post; scroll down to the Custom Search box; enter a name, and search.)

Subject	Date	Page	Title	Notes
